Inspection Services

About us

HSTTS in co-operation with Modern Testing Services (Hong Kong) Ltd (MTS) has amalgamated a number of renowned testing and inspection agencies as well as developed new ones in key world locations to become one of the world-class independent providers of technical services relating to product quality, product safety, testing, management system certification and staff training. The HSTTS / MTS cooperation in these areas features a one stop, efficient, impartial and cost-effective approach to all your textile and consumer product needs.

The business goal of the Inspection Division is to assist organisations to improve their quality output, and to improve the skill and knowledge of the people involved in assuring the quality of their products.

Inspection Services

We provide integrity assured, reliable and professional inspection services to ensure that our client's shipment would meet their satisfaction. We adopt the international recognized sample method, ANSI/ASQC Z1.4 (also known as ISO 2859 and BS 6001) to conduct inspections. Inspection could be carried out at different production stages which includes Initial Production Inspection (IPI), During Production Inspection (DPI) and Final Random Inspection (FRI) depending on client's needs. We check that quality, quantity, packaging and labeling conform to our client's specification and established approval samples. Our inspection service covers the product categories outlined below:

Category	Sub Category

Factory Audit Services

We help client to select the suitable manufacturers and/or help monitoring their manufacturers through our factory audit service. We evaluate the effectiveness of the manufacturers internal capability and quality systems from receipt of raw material through to packaging. We will make recommendations for improvement of systems and processes. Other concerns such as Social Compliance, Security System and Product Safety Practices can also be included in the audit scope or individually audited.
